

How To Contribute to the Map

As reference to what you are trying to make, please check the following [link](#).

Recommended

1. Use a laptop or PC
2. Use a mouse
3. Have a decent internet connection
4. Take your time. Don't rush the routes

Open Google Drive

1. Go to drive.google.com
 - a. Create a Gmail if you don't have one already
 - b. Select [My drive](#)
2. Right-click in the White Panel Area
3. Select [More](#) then Select [Google My Maps](#)

It will open a new [Tab](#) with something familiar to Google Maps

Add a Layer with the Bus Route and Bus Stops

4. In the new [Tab](#), click on [Add-Layer](#).
5. Name the layer as the bus Route or bus number.
For example, [Bus 15](#) or [Dora- Bikfaya](#) (*Please note: The Route is in the form of **start-Finish***)
6. Under the Google Search bar, there is the [Draw a line](#) option.
Select that and start drawing the bus route by **clicking** the various points on the map.
 - a. Name the line the same as what you called the [Layer](#).
To do this, click on the [Line](#).
The line will become highlighted and then a [pen](#) icon will show.
Click on that.
 - b. Add any info you might know in the description (*The box below the name*).
For example, pricing or time tables
 - c. Preferable to make the bus route and bus stop the same color. In the layer, you will find [Individual styles](#).
Click on it then **select** [Uniform Style](#).
Hover on [All items](#) then **click** on the Bucket icon and select a color.

I understand that this bus routes are *long*, so whenever you feel like it.

Double Click the last point you made.

Then whenever you are ready again, **click** on the line again.

Choose the edit option.

Right Click the last point and **select** [extend line](#)

Export The new Layer into a KML

1. In the upper left corner, there are 3 vertical dots. **Click** on that
2. **Select** [Export to KML/KMZ](#)
3. Instead of [Entire Map](#). **Select** the layer you just made.
4. Then **click** on [download](#)
5. [Select](#) where you want to download the file

Fill out the Form

1. Go to the following [form](#)
2. **Fill** out all the fields in the form
3. **Upload** your KML in the Form (gmail is required)
